

Lab07 - Screenshots

petek, 24. april 2026 23:30

Task 1

The script:

- prints an installation message,
- creates a folder,
- creates a tiny shell script,
- moves it into that folder,
- runs it.

Final result on screen:

Installing demo software ...

We need to generate a lot of random bytes. It is a good idea to perform
some other action (type on the keyboard, move the mouse, utilize the
disks) during the prime generation; this gives the random number
generator a better chance to gain enough entropy.
